

Name: Avsar Bosmiya, Tejas Bafna, Ayush Shah, Shrikar Reddy Challa, Sayjada Khan

Course: Business Administration

Level : L5, L4

GROUP 2

OUR LEARNINGS FROM THE EXPERIENCED TAKE THE LEAP

We are group 2 consisting of Avsar Bosmiya, Ayush Shah, Shrikar Reddy Challa, Sayjada Khan, Tejas Bafna currently studying at level 5 & level 4 respectively at NMIMS Centre for International Studies (CIS). During our orientation the Institute has been conducting online sessions with guest speakers and faculty members of NMIMS CIS who are experts in their respective fields, it was an honour to listen and understand about entrepreneurship and the BBA course from their point of view.

We learned that entrepreneurship journey does not go directly from point A to point B it is a journey consisting of ups and down equally, hopefully, a low amount of dips in downs. We also learned that you should always take the leap, for the things we are always thinking about, we should always keep listening to the ones who have more experience than you as they can give you a piece of key information, that we could be looking for, and the last thing we learned from **Mr. Anirudh Pandita** that no matter what your age is, learning can never stop it's an on-going process.

We learned this when Mr. Anirudh Pandita was talking about his journey like he used to sleep on his sister's couch but he was still was persistent to accomplish his goals, so now you could see he plays such a huge role in LOCO & Filtercopy.

We even learned that no risk can be avoided, however, it can be managed. Therefore, it should be our prime focus to reduce the impact of these risks on us and our future firm/business. This was one of the most important things we learned from **Mr. Hersh Shah**.

We loved when **Mr. Biju Dominic** showed us the example of when Human Behaviour is mixed with Architecture & Engineering, which can be so useful.

We saw different ways where the mortality rate can be reduced by speeding on the Highway because of the innovative method. It made us realize that there are so many things we don't know about our brains and how they work.

We also learned that **Mr. Dominic** is very passionate about what he does, so each morning when he wakes up, he looks forward to his day. So in a way, we would like to have something like this in the future.

Mock stock market session was wonderful and the knowledge about working stock markets, which gave us insight about how to purchase shares at what price, at what time and at what market position. We had worked as a team together on a joyful and knowledgeable mock stock which helped us to gain basic knowledge about the stock market.

Mr. John Pereira briefed us about our course, talking about do's and don'ts & and placement. **Mr. John** explained to us how we can smoothly transition from the Mumbai campus to London Campus. He gave us great insights about the job situation in Uk, Living

expenses, Visa requirements and about the optional 4th year at Kingston University, London, UK.

This learning matters to us as it shows that we should never give up on our dreams, as a dip in our journey is just another hurdle we have to overcome.

In light of this learning, we shall promise to ourselves that we have to fight/overcome the things that life will throw at us and keep on marching ahead without hesitation.

Student Learning Outcome Area: The orientation also improved our communication. It was a chance for students to learn how things work at their new college and meet other students as well as faculty and staff members. Motivated & inspired us to start our own entrepreneurship journey and manage risk effectively, while also not giving up on our dreams.
